

# InvolvingLincs

**Strategic Objective: Improving services to the Third Sector through collaboration, strategic oversight and effective use of resources**

## *What does Involving Lincs actually do?*

**Provides the opportunity** for joint delivery of services and other joint activity.

For example:

- Joint funding bids
- Joint training delivery
- Co-ordinated delivery of volunteering opportunities
- Joint research on needs, outcomes, sector worth etc.

**Acts as a route** for Third Sector Involvement in strategic developments by passing on requests for representation to members and their wider networks, e.g. the LAA, the LCCP and the emerging Third Sector Strategy research.

**Records the success** of the sector both in relation to individual organisations and wider partnerships. By bringing this information together and encouraging Third Sector groups to share their information, partners develop a wider understanding of the role, function and value of the Third Sector.

**Provides a forum** for sharing information through the use and development of its web site, e-bulletins, shared press releases, e-networks etc.

**Creates a stronger** Third Sector voice through the development of positive links with other groups and organisations e.g. the Large VCS CEO group, the emerging Single Equalities Council, Funding organisations, the Lincolnshire Community Cohesion Partnership etc.
